Patent No. US2020131964A1

GENERAL INFORMATION:

APPLICANT: CINES, Douglas B

APPLICANT: TISSUE CONFOSITIONS AND METHODS FOR MODULATING MUSCLE CELL AND

TITLE OF INVENTION: COMPOSITIONS AND METHODS FOR MODULATING MUSCLE CELL AND

TITLE OF INVENTION: COMPOSITIONS AND METHODS FOR MODULATING MUSCLE CELL AND

TITLE OF INVENTION: COMPOSITIONS AND METHODS FOR MODULATING MUSCLE CELL AND

FILE REPERENCE: 2501-06-13

CURRENT APPLICATION NUMBER: US/09/880,503

CURRENT FILING DATE: 2001-06-13

PRIOR FILING DATE: 2001-06-20

NUMBER OF SEQ ID NOS: 18

SOFTWARR: PatentIN Ver. 2.1

SED ID NO 8

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               Sequence 25, Application US/08967024C

Sequence 25, Application US/08967024C

Patent No. 613011

GENERAL INFORMATION:
APPLICANT: STEFFENS, Gerd Josef
APPLICANT: ADAOCHA, ENLY
ITILE OF INVENTION: Chimeric Proteins having Fibrinolytic
ITILE OF INVENTION: Chimeric Proteins having Fibrinolytic
MUMBER OF SEQUENCES: 25
CORRESPONDENCE ADDRESS:
ADDRESSEE: Evenson, McKeown, Edwards & Lenahan
